National Business Register

The Ministry of Statistics and Programme Implementation (MoSPI) plans to compile a national business register of all business enterprises in the country that can be periodically updated. ET explains the purpose of this exercise.

ANIRBAN BORJA

WHAT IS A NATIONAL BUSINESS REGISTER?

Just as the National Population Register records the details of every citizen, the envisaged business register will have district-wise details of establishments engaged in production or distribution of goods or services. The details will include the name of an enterprise, its location, activities, type of ownership, number of workers and PAN/TAN. The register will list all business enterprises operating in the country.

HOW IS IT DIFFERENT FROM THE DATA ALREADY BEING COLLECTED?

At present, the government conducts an Annual Survey of Industries (ASI), which is the principal source of industrial statistics. It covers relatively bigger units relating to manufacturing and repair sub-sectors but doesn't cover other industrial sectors. Besides, ASI covers only the organised sector. In contrast, the proposed business register will list all units registered for any economic activity including health, education and trade.

HOW WILL IT HELP?

Nearly 80% of India's businesses fall under the unorganised sector, information about which is very sketchy. The register will capture economic data from both organised and unorganised sectors, helping get a better fix on economic activity and the jobs situation in the country.

HOW WILL THE DATA BE COLLECTED?

The business register will list establishments at the district level covering seven Acts and authorities — the Factories Act, the Shops and Commercial Establishments Act, the Companies Act, the Societies Registration Act, the Co-operative Societies Act, the Khadi and Village Industries Board and the Directorate of Industries. Data will be collected from registration records and surveys.

WHAT IS THE STATUS OF THE REGISTER?

Rajasthan and Tamil Nadu are among a few states that have created business registers but dynamic updation of these registers is not happening. Training programmes have started and the govt plans to begin the field work in June.

INTERNATIONAL EXPERIENCE

Several among the most advanced economies — the US, EU, Australia and New Zealand — have such a list in some form.

Trade Deficit Widens to \$15.3 b in April

Export growth falls to a 4-month low of 0.64% as shipments of leather, gems and jewellery take a hit; trade gap at a 5-month high

Our Bureau

New Delhi: India's merchandise export growth slowed down to a four-month low in April with only 0.64% rise to \$26.07 billion, while imports increased at a six-month high of 4.48% to \$41.4 billion, according to official data released on Wednesday. Trade deficit widened to a five-month high in April 2019 to \$15.33 billion, as against \$15.72 billion a year ago, on the back of higher oil imports at \$11.38 billion, a jump of 9.26%, and a \$3.99 billion jump in gold imports to \$5.9 billion.

Only 14 out of 30 major export product groups were in positive territory during April 2019, including petroleum, organic and inorganic chemicals, drugs and pharma, readymade garments of all textiles, electronic

Trade Blues

Exports remain subdued in April

Trade deficit widens

KEY GROWTH SECTORS

EXPORTS: Petroleum, chemical, pharma

IMPORTS: Oil up 9.26%; gold rises 9.29%

SERVICES

Exports grow 2.39% to \$17.98 b; Imports rise 4.73% to \$11.43 b

goods and ceramic products.

"The export growth of 0.64% is not at all encouraging as almost all the labour-intensive sectors, including leather and leather products, gems and jewellery, and engineering goods, dominated by micro, small and medium enterprises fell into negative territory," Federation of Indian Export Organisations (FIEO) president Ganesh Kumar

Gupta said. According to him, these sectors are still facing liquidity problem, besides various other challenges, including global trade war, protectionism, fragile global conditions and constraints on the domestic front.

FIEO is of the view that the global trade scenario may worsen further on the back of rising trade tensions between the US and China, putting

more pressure on Indian exports in the months to come. "The uncertainty attached to it will affect the flow of investment and add to currency volatility," Gupta said.

Services export growth in April is estimated at \$17.98 billion, a rise of 2.39%, while services import was up 4.73% to \$11.43 billion, resulting in \$6.55 billion in net of services, data re-

leased by the commerce ministry showed. Overall exports, including merchandise and services, went up 1.34% to \$44.06 billion, while imports grew 4.53% to \$52.83 billion, resulting in an overall trade deficit of \$8.78 billion.

"A sharp drop of over 7% in highly employment-oriented engineering exports in April is a matter for concern for Indian exporters, who are facing global headwinds like escalated trade war, geopolitical uncertainties in the Middle East and rising cost of finance and raw material at home," Ravi Sehgal, chairman of the Engineering Export Promotion Council, said, adding that the near-sagging export makes it imperative for the RBI to cut the interest rates in its June credit policy review while measures like availability of raw material at reasonable prices should be ensured by the government.

Monsoon Set to Hit Kerala on June 6

Met dept says onset may be delayed by five days but it is likely to be a normal monsoon

Our Bureau

New Delhi: The monsoon will hit Kerala on June 6, five days later than its normal onset, the weather office said, but it has maintained that seasonal rainfall from June to September would be close to normal.

"The onset will not affect the quantum of rains and the agricultural output. More than the onset date, it's the distribution which has an impact on crops. Last year, the onset was advanced by two days to May 29 but the monsoon had ended up being below normal," said a senior IMD official.

IMD had forecast a near normal monsoon last month, which the official weather forecaster is maintaining after the announcement of its delayed onset. It said the forecast onset date of June 6 has a model error of four days.

"We still believe that the monsoon would be near normal, which is close to 96% of 50-year average for the entire four-month season," said DS Pat, head of IMD's long range forecast.

The amount of rainfall and its distribution determine crop output,

Starting Trouble

ONSET VS PERFORMANCE

Actual rainfall % Departure from normal

which influences demand for consumer goods, two-wheelers and various other products.

IMD's forecast of the monsoon onset is in line with the estimation of private weather forecaster Skymet, which, on Tuesday, has said that the monsoon will arrive in Kerala on June 4 with a two-day variation. Sky-met, however, expects rainfall to be below normal.

IMD's operational forecasts of the date of onset during the past 14 years (2005-18) have proved to be correct, except in 2015 when rains hit Kerala coast on June 5 instead of the May 30 forecast.

Homebuyers May Have to Pay 12% GST on Dues

Our Bureau

New Delhi: Homebuyers may have to cough up goods and services tax at the rate of 12% on the balance payment for an apartment if the project received a completion certificate by March 31, 2019.

According to the latest clarification in frequently asked questions, the Central Board of Indirect Taxes and Customs has said builders who have received a completion certificate for an ongoing project before April 1, 2019, will have to charge 12% GST from buyers on the balance amount due towards purchase of the flat.

In the second set of FAQs for the realty sector, it said builders will not be able to adjust the accumulated credits in ongoing projects in case they opt for lower GST rate of 5% for normal and 1% for affordable housing.

The first set of FAQs for the realty sector was issued last week to clarify doubts with regard to the migration of developers to new GST rates, which have come into force from April 1, 2019. The GST Council had in March allowed realty players to shift to 5% GST rate for residential units and 1% for affordable housing without benefit of input tax credit (ITC) from April 1, 2019.

For the ongoing projects, builders have been given the option to either continue in the 12% GST slab with input tax credit (6% for affordable housing), or opt for 5% GST rate (1% for affordable housing) without ITC.

Power Generation Growth Likely to Double in FY20

Debjay Sengupta @timesgroup.com

Kolkata: Power generation from thermal, hydel and nuclear plants is expected to grow 6.5% this fiscal, nearly double of last year's rise of 3.5%, the Central Electricity Authority has estimated.

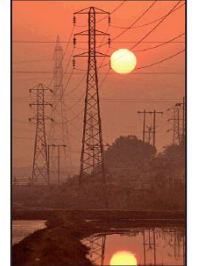

Total generation from these sources is estimated to be around 1,330 billion in 2019-20, of which 85% would be from thermal plants. Among thermal plants, coal would contribute around 79%, while the rest would come from lignite, natural gas and liquid fuels.

Nuclear plants would contribute 3.3%, while hydropower would account for 10%.

Last year, conventional sources were expected to generate 1,265 billion units but they supplied 1,249.2 billion units.

Satyavashi Majumdar, group head at ratings firm ICRA, said demand growth this year would be between 5% and 6%. Growth would be driven by the domestic sector, propelled by schemes like Pradhan Mantri Sahaj Bijli Har Ghar Yojana (Saubhagya) and rural electrification. It will also depend on whether states supply 100% of their own demand.

Demand for power has been growing at a fast pace this year. Last year, demand rose to a record, well before the usual seasonal peak. Higher supply from renewable sources helped meet demand. Highest daily-peak power de-
