Impact Assessment Study Report
On
Development of Educational Infrastructure
With special reference to
Maharaja Agrasen Technical Education
Society
New Delhi
Under
CSR Initiatives by KRBL Ltd.

KRBL LIMITED CSR PROJECT 2021-22

Background

KRBL Limited (KRBL) assigned the Impact Assessment Study of CSR project completed by Maharaja Agrasen Technical Educational Society (MAETS) during FY 2021-22 to us, in which KRBL was a contributor, KRBL being a responsible corporate citizen and being committed to the cause of working for the society and providing multiple benefits to the ones in need has always worked in the direction of Societal Development through various CSR Projects while also complying with Section 135 of the Companies Act, 2013.

During the Financial Year 2021-22, KRBL took a vision of working towards providing education to the young minds who are capable of becoming successful if provided with the right opportunity to create a major social impact. In furtherance of the same, KRBL while working towards the promotion of education, including special education and enhancing vocation skills especially among children and young minds has worked towards creating a sustainable impact being a Model of Excellence in meeting its commitment.

KRBL supports projects that create empowered individuals and communities through sustainable, social and economic development. The initiatives that have been taken by KRBL have further strengthened the image of the corporation as a socially responsible Corporate Citizen. Corporation has been very successful in bringing positive impact in the lives of the most vulnerable and marginalized sections of society such as children with special needs, socially disadvantaged groups and unemployed youths among others.

The present Impact Assessment Study was undertaken with following major objectives:

- To undertake an assessment of the projects in terms of their relevance, focus area, and contribution to the welfare/development of the beneficiaries;
- To gauge the relevance and effectiveness of the project strategies and approaches to fulfil the project objectives;
- To assess the performance of the project in terms of the effectiveness and efficiency of the expected outputs;
- To assess the Impact of the project activities on the beneficiaries;
- To ascertain the sustainability of the project after its completion, wherever applicable;
- To give recommendations for future CSR projects of similar nature.

The scope of Impact assessment study of the CSR Project includes achieving the above-mentioned objectives as applicable for the said CSR Project. Both qualitative and quantitative methods of data collection were used in the evaluation. Interviews, Group Discussions and Observations were used for data collection besides the review of the documents. Comprehensive data pertaining to the CSR project for providing services and infrastructure was provided by the KRBL. Primary data was collected from the beneficiaries of the said CSR Project, the general public of the project area and concerned project stakeholders. The information is supplemented with other secondary data relevant to the study. Secondary sources like records and reports provided by KRBL, documents maintained by the respective beneficiaries of the project and other policy related documents from various sources were referred as part of this study.

Keeping in mind the objectives of the study, the scope of work prescribed for evaluating the project's impact was carried for identifying qualitative and quantitative changes in the lives of beneficiaries and overall social development. The evaluation was conducted upon considering the need, Memorandums of Understanding (MoU) between MATES and KRBL and performance of project on various aspects prescribed in the rationale of the work.

The present impact assessment included a comprehensive study on the impact on individual beneficiaries and the community as a whole. The study also aimed to get clarity on the objective and relevance of the project which included pre-planned site visits by the assessment team.

This summary has been prepared based on the impact evaluation undertaken by the assessment team for the project, highlighting the major accomplishments of the project. This summary provides a consolidated analysis and feedback provided by beneficiaries and other stakeholders. The brief project summary has been given here under:

Project	:	Construction of a Civil Structure, building at Maharaja Agrasen Institute of Technology
Location	:	New Delhi
Implementing Agency	:	Maharaja Agrasen Technical Educational Society
Outlay	:	Rs. 1 Crore
Observations	:	The project has resulted in an increase in the student enrolment and ensured availability of good educational infrastructure to students.

Summary:

Maharaja Agrasen Technical Educational Society (MAETS), which is a selfless service organization in the field of higher education, has been running Maharaja Agrasen Institute of Technology, an educational institution imparting higher education with the motive of providing quality and value based education. MAETS aimed at constructing a class room building at Maharaja Agrasen Institute of Technology, New Delhi, which is now being utilized in promotion of education, including special education and enhancing vocation skills especially among children and young minds i.e. the activities specified under the Schedule-VII of the Companies Act, 2013. The project for providing infrastructural help to the educational institution should be continued in the future as well. It is recommended that for the strengthening of the project more required facilities should be provided, as and when required.

The CSR initiative of Maharaja Agrasen Technical Education Society has given a new look to the Maharaja Agrasen Institute of Technology by upgrading the Classrooms, equipping them with all necessary facilities, Boards, toilets, septic tanks, water tanks, pathways, boundary walls, alternative power system etc. Teachers and students are now in a better position to have continued personal as well as professional growth along with the hygienic conditions and education friendly atmosphere.

The new infrastructure facility is catering to the needs of approx. 300 engineering students across the country and is ultimately helping in building the nation. The new has been facilitated with a good campus with new classrooms equipped with all facilities like hygienic civil structure, new furniture and laboratories to make their conceptual understanding better through experiments. The feeling of contentment among the beneficiaries and other stakeholders for having newly built classrooms, laboratories and other facilities for them.
